Anthony E. Nocentino

- **Principal Field Solution Architect @ Pure Storage**
  - Specialize in system architecture and performance
  - Masters Computer Science
- **email**: anocentino@purestorage.com
- **Twitter**: @nocentino
- **Blog**: www.nocentino.com
- **GitHub:** https://github.com/nocentino/
- **Pluralsight Author**: www.pluralsight.com
- **Founding Organizer of EightKB** - www.eightkb.online
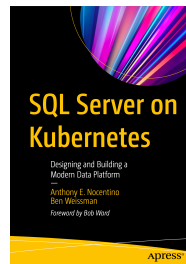

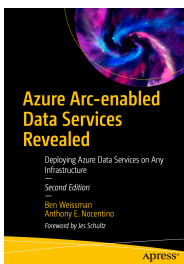

Course Overview

- **Module 0** - Introduction

- **Module 1** - Container Fundamentals and Introducing Kubernetes

- **Module 2** - Kubernetes Architecture and API Objects

- **Module 3** - Interacting With Your Cluster

- **Lunch @ 12:00-12:45**

- **Module 4** - Deploying Applications in Kubernetes

- **Module 5** - Building and Deploying Container-based Applications in Kubernetes

Module 1

- **Container Fundamentals**

  - Container Fundamentals

  - Container Based Application Deployment

  - The Need for Container Orchestrators

Centino
systems

Module 2

- **What is Kubernetes**

- **Kubernetes Architecture and API Objects**

  - Exploring Kubernetes Architecture

  - Core API Primitives

  - Getting Kubernetes

Centino
systems

Module 3

- **Interacting With Your Cluster**
  - Using `kubectl` to Interact with Your Cluster
  - Application Deployment Basics in Kubernetes

Centino
systems

Module 4

- **Deploying Applications in Kubernetes**

  - Namespaces

  - Labels

  - Services

  - Deployments

Module 5

- **Building Containers and Deploying Applications in Kubernetes**

  - Building a local web application

  - Building a container image

  - Container Registries

  - Deploying in Kubernetes

Workshop Goals

- **Give you the building blocks you need to start your Kubernetes journey**

- **Start to think about how you can use Kubernetes to build your next generation data or application platform**

- **Decks and demos are available for download**

- **Me talking less with you hands on more!**

https://github.com/nocentino/PSHSummit2023

Logistics

- **Questions throughout**

- **The tech bar is high in this talk…**

  - **If there's a topic that you're not familiar with ask!**

Centino
systems

Introductions

- **Name?**

- **Where you are from?**

- **Company name?**

- **Your role?**

- **What are topic are you most interested in today's session?**

- **Why Kubernetes?**

Let's Go!

- **Time to get started on Module 1**
  - **Container Fundamentals**
